

## List of Equipment in Biochemistry Lab

| <b>S.No</b> | <b>Instruments</b>                          |
|-------------|---------------------------------------------|
| 1           | Colorimeter                                 |
| 2           | Temperature controlled Water bath           |
| 3           | Digital Weighing Balance                    |
| 4           | Digital pH Meter with Combined pH electrode |
| 5           | Digital colorimeter                         |
| 6           | pH analyzer with Cl-51B a                   |
| 7           | Digital pH meter                            |
| 8           | Autoclave (Portable)                        |
| 9           | Water Purifier                              |
| 10          | Incubator                                   |
